

Get going in five steps

Two minutes, phone in hand. Everything else can wait.

1

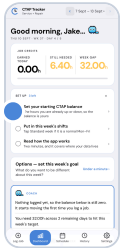

Put it on your phone

Open the link I sent you in **Safari**, then:

Share

→ Add to Home Screen

From now on, open it from the icon.

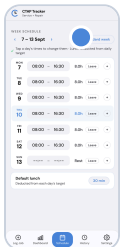

2

DASHBOARD

Enter your CTAP balance

Tap **Set your starting CTAP balance** and put in the hours you're up or down. **Skip this and everything starts from zero.**

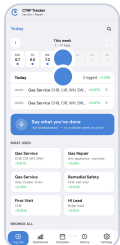

3

SCHEDULE TAB

Set your week

Normal Mon–Fri? Tap **Standard week**. Done. Anything else, tap a day's times, set them, and **Confirm**.

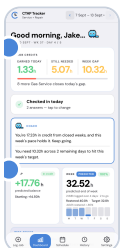

4

LOG JOB TAB

Log your jobs

Tap a job from **Most used**, or a category tile below it. Or tap the blue bar and say it: **“six breakdowns and two services”**, then tap **Log**. Whatever you log shows under the week strip, on the day it went to.

5

DASHBOARD

See where you stand

Earned today, what's **still needed**, and your **CTAP balance**. Tap the balance to see what it's worth in pounds.

That's it.

- Your figures stay on your phone. Nobody else can see them.
- There's no backup, so don't delete the app. If something looks wrong, message me first.
- Want more? Coach, the Forecast, History and the rest are in the [full guide](#).
